## A Geographical Look at Home Runs

## Fred Worth, Ph.D. Professor of Mathematics and Computer Science

Abstract - In this paper, we will look at career home runs for major league baseball players based on the state in which they were born.

Major league baseball is known for its interesting statistics. There are multitudes of numbers and multitudes of ways of looking at the numbers. For some now-forgotten reason, I once started looking at home runs by the state of birth of the home run hitter. This chart gives home runs by state (including the District of Columbia). Consider the chart below, where " n " denotes the number of players born in that state who have hit at least one major league home run. [Note: All data comes from Lee Sinin's Sabermetric Baseball Encyclopedia.]

|  | HRs | n |  |  | HRs | n |  |  | HRs | n |
| :--- | :---: | :---: | :--- | :--- | :---: | :---: | :--- | :--- | :---: | :---: |
| Alabama | 7985 | 153 |  | Kentucky | 2851 | 100 |  | North Dakota | 284 | 7 |
| Alaska | 71 | 5 | Louisiana | 4057 | 97 | Ohio | 10682 | 369 |  |  |
| Arizona | 876 | 32 |  | Maine | 262 | 23 |  | Oklahoma | 5090 | 105 |
| Arkansas | 3252 | 61 |  | Maryland | 4729 | 101 |  | Oregon | 2293 | 46 |
| California | 41790 | 894 |  | Massachusetts | 4314 | 217 |  | Pennsylvania | 13666 | 493 |
| Colorado | 414 | 27 | Michigan | 5057 | 149 |  | Rhode Island | 1093 | 30 |  |
| Connecticut | 1999 | 76 |  | Minnesota | 2505 | 62 |  | South Carolina | 3496 | 88 |
| D.C. | 600 | 35 | Mississippi | 3256 | 84 | South Dakota | 122 | 10 |  |  |
| Delaware | 563 | 18 | Missouri | 6882 | 234 | Tennessee | 3045 | 102 |  |  |
| Florida | 8984 | 163 | Montana | 198 | 9 | Texas | 11238 | 303 |  |  |
| Georgia | 5672 | 139 | Nebraska | 1137 | 46 | Utah | 170 | 11 |  |  |
| Hawaii | 202 | 15 | Nevada | 200 | 8 | Vermont | 540 | 17 |  |  |
| Idaho | 712 | 11 | New Hampshire | 301 | 20 | Virginia | 2624 | 95 |  |  |
| Illinois | 11504 | 393 | New Jersey | 3830 | 146 | Washington | 2952 | 68 |  |  |
| Indiana | 3601 | 129 | New Mexico | 664 | 9 | West Virginia | 1803 | 50 |  |  |
| Iowa | 1611 | 75 | New York | 13008 | 404 | Wisconsin | 2534 | 83 |  |  |
| Kansas | 1756 | 66 | North Carolina | 3507 | 168 | Wyoming | 244 | 6 |  |  |

Not surprisingly, California has both the most home runs and the most home run hitters. Also not surprisingly, there is a strong correlation between the number of players who have hit home runs and the number of home runs from an individual state. The chart to the right shows the scatter plot of the data. The correlation coefficient is

## Academic Forum 24

0.96. California, as is often the case, is an unusual data point. Removing California from the data produces a correlation coefficient of 0.95 for the remaining data. In either case, more players hitting home runs generally means more home runs.

There are, however, some interesting variations if we look at the mean and median home runs per state. This chart presents that data, in descending order according to the mean.

| state | mean | median | state | mean | median |  |
| :--- | :---: | :---: | :--- | :--- | :---: | :---: |
| New Mexico | 73.78 | 8 |  | Tennessee | 29.85 | 6 |
| Idaho | 64.73 | 3 | Missouri | 29.41 | 7 |  |
| Florida | 55.12 | 12 | Illinois | 29.27 | 6 |  |
| Arkansas | 53.31 | 15 |  | Ohio | 28.95 | 7 |
| Alabama | 52.19 | 13 | Kentucky | 28.51 | 5 |  |
| Oregon | 49.85 | 9 |  | Indiana | 27.91 | 7 |
| Oklahoma | 48.48 | 7 |  | Pennsylvania | 27.72 | 6 |
| Maryland | 46.82 | 6 |  | Virginia | 27.62 | 6 |
| California | 46.74 | 13 | Arizona | 27.38 | 14 |  |
| Washington | 43.41 | 8 | Kansas | 26.61 | 6 |  |
| Louisiana | 41.82 | 5 | Connecticut | 26.30 | 6 |  |
| Georgia | 40.80 | 9 | New Jersey | 26.23 | 6 |  |
| Wyoming | 40.67 | 22 | Nevada | 25.00 | 3 |  |
| North Dakota | 40.57 | 7 | Nebraska | 24.72 | 7.5 |  |
| Minnesota | 40.40 | 6 | Montana | 22.00 | 3 |  |
| South Carolina | 39.73 | 9 | Iowa | 21.48 | 6 |  |
| Mississippi | 38.76 | 10.5 | North Carolina | 20.88 | 6 |  |
| Texas | 37.09 | 6 | Massachusetts | 19.88 | 5 |  |
| Rhode Island | 36.43 | 6.5 | D.C. | 17.14 | 7 |  |
| West Virginia | 36.06 | 11 | Utah | 15.45 | 3 |  |
| United States | $\mathbf{3 4 . 7 4}$ | $\mathbf{7}$ | Colorado | 15.33 | 4 |  |
| Michigan | 33.94 | 7 | New Hampshire | 15.05 | 4 |  |
| New York | 32.20 | 7 | Alaska | 14.20 | 2 |  |
| Vermont | 31.76 | 3 | Hawaii | 13.47 | 2 |  |
| Delaware | 31.28 | 3 | South Dakota | 12.20 | 6.5 |  |
| Wisconsin | 30.53 | 9 | Maine | 11.39 | 3 |  |

The apparent tendency here is for states significantly above or below the national mean to be states with comparatively few home run hitters. This makes sense since a small n will result in a high mean if there is a single home run hitter with a large number of home runs.

Analysis of this data is not the purpose of this paper. Instead, I wanted to look at something that was interesting to me shortly after I first looked at the data. Harmon Killebrew was one of the most feared sluggers in the game in the 1960s, hitting more home runs (393) in that decade than any other player. Killebrew was born in Idaho, which has a home run total of 712.

## Academic Forum 24

Killebrew hit 573 of those home runs, accounting for $80.478 \%$ of Idaho's home runs. As a result of that observation, I decided to look at all states and see what percentage of that states home runs were hit by its all time leader. The following chart presents that data. The data is in descending order by percentages by the leader. The next item in our list of "things that are not surprising" is that almost all of the states near the top are the ones near the bottom of the "total HR" list. Rhode Island is the only one in the top 16 of players with high percentages that is not in the bottom 16 of total HR.

| State | Leader(s) | HR | \% |
| :--- | :--- | :---: | :---: |
| Idaho | Harmon Killebrew | 573 | $80.478 \%$ |
| Alaska | Josh Phelps | 57 | $80.282 \%$ |
| Vermont | Carlton Fisk | 376 | $69.630 \%$ |
| Nevada | Marty Cordova | 122 | $61.000 \%$ |
| Utah | Duke Sims | 100 | $58.824 \%$ |
| Montana | John Lowenstein | 116 | $58.586 \%$ |
| New Mexico | Ralph Kiner | 369 | $55.572 \%$ |
| Hawaii | Mike Lum | 90 | $44.554 \%$ |
| Wyoming | Mike Devereaux | 105 | $43.033 \%$ |
| North Dakota | Travis Hafner | 118 | $41.549 \%$ |
| South Dakota | Mark Ellis | 39 | $31.967 \%$ |
| New Hampshire | Phil Plantier | 91 | $30.233 \%$ |
| D.C. | Don Money | 176 | $29.333 \%$ |
| Maine | Del Bissonette | 66 | $25.191 \%$ |
| Rhode Island | Paul Konerko | 245 | $22.415 \%$ |
| Colorado | Johnny Frederick | 85 | $20.531 \%$ |
| Oregon | Dave Kingman | 442 | $19.276 \%$ |
| Minnesota | Dave Winfield | 465 | $18.563 \%$ |
| West Virginia | George Brett | 317 | $17.582 \%$ |
| Delaware | Dave May and Randy Bush | 96 | $17.052 \%$ |
| Connecticut | Mo Vaughn | 328 | $16.408 \%$ |
| Maryland | Babe Ruth | 714 | $15.098 \%$ |
| Iowa | Hal Trosky | 228 | $14.153 \%$ |
| Louisiana | Mel Ott | 511 | $12.596 \%$ |
| Kansas | Bob Horner | 218 | $12.415 \%$ |
| Virginia | Willie Horton | 325 | $12.386 \%$ |
| Arizona | Jack Howell | 108 | $12.329 \%$ |
| Wisconsin | Al Simmons | 307 | $12.115 \%$ |
| Washington | Ron Santo | 342 | $11.585 \%$ |
| South Carolina | Jim Rice | 382 | $10.927 \%$ |
| Kentucky | Jay Buhner | 310 | $10.873 \%$ |
| Mississippi | Ellis Burks | 352 | $10.811 \%$ |
| Oklahoma | Mickey Mantle | 536 | $10.530 \%$ |
| Massachusetts | Jeff Bagwell | 449 | $10.408 \%$ |
|  |  |  |  |

| Nebraska | Wade Boggs | 118 | $10.378 \%$ |
| :--- | :--- | :---: | :---: |
| Indiana | Gil Hodges | 370 | $10.275 \%$ |
| Alabama | Hank Aaron | 755 | $9.455 \%$ |
| Tennessee | Todd Helton | 286 | $9.392 \%$ |
| Georgia | Frank Thomas | 487 | $8.586 \%$ |
| Arkansas | Brooks Robinson | 268 | $8.241 \%$ |
| New Jersey | Eric Karros | 284 | $7.415 \%$ |
| Florida | Fred McGriff | 493 | $5.488 \%$ |
| Texas | Frank Robinson | 586 | $5.214 \%$ |
| Missouri | Yogi Berra | 358 | $5.202 \%$ |
| Ohio | Mike Schmidt | 548 | $5.130 \%$ |
| Michigan | John Mayberry and Kirk Gibson | 255 | $5.043 \%$ |
| North Carolina | Ray Durham | 175 | $4.990 \%$ |
| Pennsylvania | Reggie Jackson and Ken Griffey Jr. | 563 | $4.120 \%$ |
| Illinois | Jim Thome | 472 | $4.103 \%$ |
| New York | Lou Gehrig | 493 | $3.790 \%$ |
| California | Barry Bonds | 734 | $1.756 \%$ |

The following chart plots n against the percentage of home runs by the state's leader.

The last items I will mention that I would consider "not surprising" come from this chart. First, is the fact seen here that the large percentages are all in states with small n. Second, all of the states with large $n$ have fairly small percentages. There are, however, some states with fairly small $n$ with a small percentage coming from the leader. This is simply because some of those states, such as Delaware, have never had a player who hit many home runs.

Another item I found of interest was how many players with higher home run totals were born in particular states. This last table includes the names of any hitters from the state with 400 or more home runs, and the numbers of hitters with 300 or more, 200 or more and 100 or more.

|  | at least 400 | at least 300 | at least 200 | at least 100 |
| :---: | :---: | :---: | :---: | :---: |
| Alabama | Hank Aaron 755 Willie Mays 660 Willie McCovey 521 Billy Williams 426 | 6 | 10 | 20 |
| Alaska | 0 | 0 | 0 | 0 |
| Arizona | 0 | 0 | 0 | 3 |
| Arkansas | 0 | 0 | 3 | 14 |
| California | Barry Bonds 734 Mark McGwire 583 Ted Williams 521 Eddie Murray 504 Darrell Evans 414 Duke Snider 407 | 19 | 53 | 131 |
| Colorado | 0 | 0 | 0 | 0 |
| Connecticut | 0 | 1 | 1 | 6 |
| Delaware | 0 | 0 | 0 | 0 |
| Florida | Fred McGriff 493 Gary Sheffield 455 Andre Dawson 438 | 7 | 14 | 30 |
| Georgia | Frank Thomas 487 | 3 | 6 | 20 |
| Hawaii | 0 | 0 | 0 | 0 |
| Idaho | Harmon Killebrew 573 | 1 | 1 | 1 |
| Illinois | Jim Thome 472 | 5 | 14 | 24 |
| Indiana | 0 | 2 | 5 | 10 |
| Iowa | 0 | 0 | 1 | 4 |
| Kansas | 0 | 0 | 1 | 7 |
| Kentucky | 0 | 2 | 4 | 7 |
| Louisiana | Mel Ott 511 | 4 | 7 | 10 |
| Maine | 0 | 0 | 0 | 0 |
| Maryland | $\begin{gathered} \text { Babe Ruth } 714 \\ \text { Jimmie Foxx } 534 \\ \text { Cal Ripken } 431 \\ \hline \end{gathered}$ | 5 | 7 | 11 |
| Massachusetts | Jeff Bagwell 449 | 1 | 2 | 10 |
| Michigan | 0 | 0 | 5 | 18 |
| Minnesota | Dave Winfield 465 | 1 | 4 | 8 |
| Mississippi | 0 | 2 | 4 | 10 |
| Missouri | 0 | 2 | 4 | 17 |
| Montana | 0 | 0 | 0 | 1 |

| New York | Lou Gehrig 493 Alex Rodriguez 464 Carl Yastrzemski 452 | 6 | 15 | 36 |
| North Carolina | 0 | 0 | 0 | 12 |
| North Dakota | 0 | 0 | 0 | 2 |
| Ohio | Mike Schmidt 548 | 3 | 8 | 28 |
| Oklahoma | Mickey Mantle 536 Willie Stargell 475 | 4 | 8 | 14 |
| Oregon | Dave Kingman 442 | 2 | 3 | 7 |
| Pennsylvania | Reggie Jackson \& Ken Griffey Jr. 563 <br> Stan Musial 475 <br> Mike Piazza 419 | 7 | 15 | 32 |
| Rhode Island | 0 | 0 | 2 | 4 |
| South Carolina | 0 | 2 | 4 | 10 |
| South Dakota | 0 | 0 | 0 | 0 |
| Tennessee | 0 | 0 | 3 | 10 |
| Texas | Frank Robinson 586 <br> Ernie Banks \& Eddie Mathews 512 | 7 | 11 | 27 |
| Utah | 0 | 0 | 0 | 1 |
| Vermont | 0 | 1 | 1 | 1 |
| Virginia | 0 | 1 | 2 | 7 |
| Washington | 0 | 2 | 6 | 9 |
| West Virginia | 0 | 1 | 1 | 7 |
| Wisconsin | 0 | 1 | 2 | 6 |
| Wyoming | 0 | 0 | 0 | 1 |
| D.C. | 0 | 0 | 0 | 1 |

The last thing I will consider is players who, in 2006, became their state's all time native son home run champion or those who likely will in 2007.

Mark Ellis hit 11 home runs in 2006 bringing his total to 39, taking the record from Dave Collins who had 32.

Gabby Hartnett's Rhode Island standard of 236 fell when Paul Konerko hit 35 home runs giving him a career total of 245 .

Pennsylvania now has a tie for the top spot. Reggie Jackson's record of 563 was equaled by Ken Griffey Jr. who hit 27 home runs in 2006.

North Dakota's new leader is Travis Hafner. His 42 home runs in 2006 left him with 118, four ahead of former leader Darin Erstad.

Mark Grace's total of 173 is now second to Ray Durham whose 26 home runs left him with 175.

The following chart shows players who will probably become their state's all-time leader in 2007.

| State | Current Leader | Likely New Leader |
| :--- | :--- | :--- |
| Arizona | Jack Howell 108 | Shea Hillenbrand 104 |
| Delaware | Dave May and Randy Bush 96 | John Mabry 95 |
| New York | Lou Gehrig 493 | Alex Rodriguez 464 |

Obviously a lot of other information or observations could be gleaned from this data. This serves to confirm baseball's place as the most perfect sport ever invented.

## Biography

Fred Worth received his B.S. in Mathematics from Evangel College in Springfield, Missouri in 1982. He received his M.S. in Applied Mathematics in 1987 and his Ph.D. in Mathematics in 1991 from the University of Missouri-Rolla where his son is currently attending school. He has been teaching at Henderson State University since August 1991. He is a member of the Society for American Baseball Research, the Mathematical Association of America and the Association of Christians in the Mathematical Sciences.
